ABOUT

Product designer with 5+ years of commercial experience, working in teams ranging from 3 to 30 members, both remotely and on-site. Built full design cycle: from gathering product requirements and user research to delivering pixel-perfect interfaces, design systems, and shipping features to production. Strong background in fintech, mobile UX, and design-to-development handoff thanks to my hybrid designer/developer background.

In addition to core product design skills, I actively use AI in my daily workflow — from ideation and copy to generating and refining UI variants — and I'm fluent in vibe coding: shipping production-ready landing pages, prototypes, and small products end-to-end using Cursor, v0, Lovable, Webflow, and Framer. Passionate about the evolution of AI design tooling and stay up-to-date with these topics.

SKILLS

Design: Figma, Sketch, Adobe XD, Photoshop, Illustrator, Principle, Protopie, design systems, UX research, wireframing, prototyping, user flows, accessibility (WCAG), mobile UI/UX, responsive design, fintech UX, B2B internal tools, design-to-dev handoff

Other: AI tools (ChatGPT, Claude, Midjourney), vibe coding (Cursor, v0, Lovable), Webflow, Framer, HTML, CSS, JavaScript, Jira, Notion, Linear, Miro

EXPERIENCE

BANCO PLATA

03/2024 - 05/2026, 2.2 YEARS

Senior Product Designer

- Led design and UX strategy for Banco Plata's internal fintech tools, improving operational workflows for support, risk, and back-office teams
- Used AI tools (ChatGPT, Claude, Midjourney) to accelerate ideation, generate UI variants, and ship designs ~40% faster than the previous baseline
- Prototyped internal tools in code with Cursor and v0, validating flows with stakeholders before involving engineering and reducing rework

GLOVO

01/2022 - 03/2024, 2.2 YEARS

Mobile UI/UX Designer

- Designed and iterated on mobile UI/UX across critical user journeys (checkout, order tracking, address selection), focusing on clarity, reduced friction, and platform consistency
- Built interactive prototypes in Framer and Protopie to validate flows with users before development, reducing post-release UX issues

YANDEX

08/2020 - 12/2021, 1.4 YEARS

Designer / Developer

- Designed and iterated landing pages, promo pages, and digital campaign materials for Yandex projects
- Built several landing pages end-to-end (design + frontend), shortening the marketing-to-launch cycle by working without a separate developer handoff

INDEPENDENT

01/2020 - PRESENT

Designer / Developer (Freelance)

- Designed and shipped freelance projects end-to-end using AI and vibe coding tools (Cursor, v0, Lovable, Webflow, Framer), launching landing pages and small product MVPs in days instead of weeks
- Delivered UI experiments and MVPs for early-stage clients, owning the full pipeline: research, design, build, and launch
- Built a portfolio of work spanning fintech, SaaS, and consumer brands

EDUCATION

POLYTECHNIC UNIVERSITY, ST. PETERSBURG — BACHELOR, 2020 - 2024

Information and computer science

POLYTECHNIC UNIVERSITY, ST. PETERSBURG — MASTER, 2024 - 2026

Development and maintenance of a high-quality software product
